

The essentials at a glance:

The product: Profi single-lever mixer for the kitchen with reduced fitting height and projection and a flexible silicone hose with no visible springs.

The special feature: functionality and adaptability in the smallest of spaces

Product concept and design: Sieger Design

Available for delivery: February 2019

Now available: Compact Profi single-lever mixer from Dornbracht – for adaptable and functional working in the kitchen

Iserlohn, March 2019

Working adaptably and in comfort at the water point. The newly available Profi single-lever mixer from Dornbracht provides great freedom of movement – even when space is at a premium. This is because the low height and projection of the fitting, as well as its exceptionally flexible silicone hose, make it easy to install and operate. Thanks to its reduced design language, the new Profi single-lever mixer blends aesthetically into different furnishing styles. It can also be positioned anywhere at the water point. This gives rise to a wide variety of design options.

Dornbracht's Profi single-lever mixer range for the kitchen is gaining a more compact variant. A mere 45 centimetres tall and with a 20-centimetre projection, the small Profi fitting is also suitable for kitchens where space is limited around the water points. For instance, the Profi single-lever mixer can be installed in alcoves, under wall cupboards or under shelves – spaces that are often available in domestic kitchens.

Minimal design language for maximum freedom of expression

The compact Profi single-lever mixer has an unobtrusive design language and is delicate and modern. It is available in metallic surfaces chrome, platinum matt, cyprum and dark platinum matt. Compared with existing Profi single lever mixers, the new Profi fitting has no visible springs, but instead has a black and aesthetically pleasing silicone hose. Its impressively velvety and high-quality finish is antistatic, making it quick and easy to clean.

Dornbracht is adding the compact Profi single-lever mixer to its varied kitchen portfolio of fittings, miscellaneous items and kitchen sinks in different designs and finishes. As a result, there are even more ways to arrange the water point individually and holistically. For instance, the Profi single-lever mixer can be combined with Dornbracht's glazed steel kitchen sinks in sand, white and black, or with the polished stainless steel sinks.

Professional functionality

The extremely flexible silicone hose of the Profi single-lever mixer considerably increases the fitting's radius of action. It can be comfortably taken down from its cone-shaped mounting or firmly attached to it, in keeping with the operation being performed in the kitchen. It is quick and easy to alternate between flow modes (spray or air-enriched flow) at any time. These are ergonomically selected directly on the back of the spray. Both hose and mounting can be moved and turned separately, making it even more comfortable to use the fitting.

Additional information about the kitchen portfolio can be found at kitchen.dornbracht.com

About Dornbracht

Aloys F. Dornbracht GmbH & Co. KG, with headquarters in Iserlohn, is a globally active, family-run manufacturer of high-quality designer fittings and accessories for bathroom/spa and kitchen. The Dornbracht brand claim "Culturing Life" continues the years of discussion and debate about these environments and expands the company's fundamental design and water expertise: technological innovation to promote connectivity and comfort, and the prevention of ill health through a focus on daily well-being, will increasingly characterise the company's future brand orientation and product development. Dornbracht is forever designing - and cultivating - life anew. A long-running cultural commitment through the Culture Projects provides Dornbracht with an ongoing source of fresh inspiration, while advancing innovation and technology leadership in bathrooms and kitchens. The intelligent, open Smart Water system makes Dornbracht one of the first to transpose the opportunities and possibilities of digitalisation to these environments. Dornbracht is part of the Dornbracht Group that, along with Alape, brings together two premium bathroom and kitchen suppliers. Enthusiasm for innovative technologies and the highest quality of workmanship is simply part of everyday life for more than 1,000 Group employees.
