## **Dornbracht CL.1 in Dark Platinum matte: Progressive design proves its versatility**

Iserlohn, March 2021

The versatility of this characteristic Dornbracht design is especially evident when our custom finishes come into play as an additional design dimension. An example is how the shape of the CL.1 fitting appears more sculptural in the dark, semi-gloss finish Dark Platinum matte.

The trend towards dark, matte surfaces is also catching on in the bathroom, offering numerous ways to individualize and interpret shapes. When used on CL.1, the finish Chrome fuses industrial character with the luxurious, progressive design of the fitting.

### **CL.1 now in Dark Platinum matte**

CL.1 in Dark Platinum matte gives the design a distinctly sculptural character. With its fine brushed look and semi-gloss finish, Dark Platinum matte has a noble and extraordinary feel.

### **Customizable with different handle types**

In addition to the shape of the fitting and the selection of finishes available, different handle types give CL.1 yet another design dimension. Handles are available in one smooth and two textured variants, each having a distinctive look and feel. Dornbracht's addition of these exceptional surface types further enhances your personal design freedom in the bathroom.

Another option is a flat, cylindrical handle shape that gives the CL.1 design a slightly more voluminous appearance.

### **Dornbracht CL.1: A unique spray type at the sink**

A specially developed spray face rinses the hands in a particularly gentle manner with its 40 soft jets, consuming water economically at a flow rate of only 3.9 liters per minute.

CL.1 is also available in the galvanized finishes Chrome and Platinum matte, and includes a wide range of fittings and accessories for sinks, showers, tubs and bidets.

### **Highest manufacturing quality**

The velvety finish of Dark Platinum matte is achieved through a special matting process that Dornbracht has developed. Before the finish is applied, each part of the fitting is brushed individually, in some cases by hand, in a prespecified direction. This guarantees that the individual particles of the finish can settle down into the finest recesses of the brush strokes. This unique Dornbracht procedure, which requires the highest technological and craftsmanship know-how, preserves the texture of the surface and gives it its exceptional look.

#### **About Dornbracht**

Dornbracht, with headquarters in Iserlohn, Germany, is a leading specialist for superior designer fittings and accessories for bathrooms, spas and kitchens. The company was founded in 1950 and today is internationally renowned among architects, designers and luxury consumers for its product portfolio in more than 125 markets.

As a luxury brand, Dornbracht prides itself on its innovative technology and "Made in Germany" manufacturing standards which are made possible by state-of-the-art production technologies and highly qualified employees.

The brand is driven by its clearly defined Design Principles which ensure every product will remain timeless and relevant for generations to come, characteristics for which Dornbracht has achieved worldwide recognition.
